Q4 | Leave Days Taken vs. Performance Rating

FINDING

- Employees with 31+ leave days show the HIGHEST avg performance (3.16).
- Those taking 16–30 days show the LOWEST rating (2.95).
- Differences are narrow (range: 0.21), suggesting leave alone doesn't drive performance.
- Recommend deeper analysis combining performance type and department.

Q5 | Contract Employee Concentration by Branch

Sharjah

KEY TAKEAWAYS & RECOMMENDATIONS

1

IT Dept Dominance

IT has the most staff (103). Consider if this aligns with strategic priorities vs. leaner depts like Operations (36).

2

Salary Equity Review

Sales earns 9% more than IT despite IT being largest. A compensation benchmarking review is recommended.

3

Hiring Peaked in 2024–25

Growth doubled from 2023 to 2024. Sustaining this in 2026 requires proactive talent pipeline management.

4

Leave ≠ Performance Drop

Adequate leave (31+ days) is associated with slightly higher performance — supports healthy leave policies.

5

Sharjah Contract Reliance

29.1% contract workforce in Sharjah suggests flexibility — review for compliance and benefits equity.

6

Nationality Wage Gaps

AED 3,798 gap between Lebanese and UAE nationals. Conduct pay equity audit across nationalities.
